Water Finding Paste & Oil Gauging Paste 'KOLOR KUT' USA

Water Finding Paste 85g (ID - 05097)

KOLOR KUT WATER FINDING PASTE is golden brown in color and turns brilliant red upon contact with water. This product will successfully gauge water content in all petroleum and hydrocarbons as well as sulfuric acid, nitric acid, hydrochloric acid, ammonia, soap solutions, salt and other alkaline solutions.

DIRECTIONS FOR USE: Rub a thin film of KOLOR KUT WATER FINDING PASTE on a clean gauge line or rod. Approximately 1/2 inch of water level is exposed by dipping lower tube into tank until bottom is reached. Level will appear by product contact of colors. Instantaneous in gasoline, diesel, kerosene and jet oils. Heavy oils require a few seconds.

Water Finding Paste Modify 70g (ID - 26750)

Conforms to MIL-W-3779

KOLOR KUT MODIFIED WATER FINDING PASTE has been designed for use in Methanol, Ethanol, and other fuel systems. Alcohols are soluble in fuels in all proportions. When they are water-free but releasing small amounts of water can cause separation of alcohol from the fuel. The moisture clinging to the interior of the storage tank contains a high concentration of alcohol and cannot be detected by most water detection paints.

KOLOR KUT MODIFIED WATER FINDING PASTE changes from dark brown in color to bright red on contact with water. These separated alcohol solutions with as little as 0.1% water will turn the paste yellow. This product is designed for use in reformulated and oxygenated fuel systems. After testing, if seems that alcohol or alcohol agents in fuels have very little effect on the performance of the product.

Oil Gauging Paste 62g (ID - 05098)

KOLOR KUT GASOLINE GAUGING PASTE is light pink in color and turns red upon contact with gasoline, diesel, kerosene, lamp oil, crude oil, jet fuels, and other hydrocarbons. A most effective product for oil indicators.

Use at temperature range of 35° F to 115° F for preservation of product.

Water Finding Paste 'SAR-GEL' USA 1oz
น้ำยารัดน้ำ Gasohol ชื่อ SAR-GEL

The white cream turn to pink on contact with water. Work well in alcohol, gasoline, ethanol, diesel, jet fuel, biodiesel, solvent. No need to purchase different types of water indicating products.
