Description

Specifications

Pressure Vacuum Vents are installed on the top of vent pipes from underground or aboveground fuel storage tanks.

VV-V & VV-VR Pressure Vacuum Vent

Pressure Vacuum Vents are installed on the top of vent pipes from underground or aboveground fuel storage tanks. The vent cap and internal wire screen are designed to protect the tank vent lines against intrusion and blockage from water, debris or insects. A normally closed poppet in the valve opens at a predetermined pressure or vacuum setting to allow the tank to vent.

Package:

Net Weight: 0.806 kg/pc

Gross Weight: 0.83 kg/pc

45.5 X 45.5 X 50 cm/case of 36 pcs

Note: VV-VR is used for Vapor Recovery System of Petrol Station
